

PRODUCT MANAGER

PM and builder launching marketplace products end to end. Built Turo's Co-Host Network from zero to \$50M in GBV as the primary product, design, and engineering resource, and now lead pricing, payments, and reliability products for Turo's host marketplace. Side projects include real-time multi-user AI products and a DTC e-commerce business. **TL;DR: I ship things.**

PROFESSIONAL EXPERIENCE

Product Manager • Growth & Efficiency • Turo

Jun 2025 - Present

Product manager for high-leverage systems across pricing, payments, and trip reliability on Turo's marketplace, owning product strategy and execution. Shipped in-app vehicle swaps, collapsing a 30-minute support workflow into a 30-second product flow and reducing support calls by 50%. Led pricing, payments, and reliability initiatives including redesigned non-refundable discounts to improve conversion while protecting host earnings, host payment splitting, and guest flight tracking.

Manager, Product Marketing • Seed Product Innovation Lab • Turo

Jan 2023 - Jun 2025

Built and scaled Turo's Co-Host Network from zero to \$50M in GBV, launching a new business vertical that matches vehicle investors with expert operators. Owned end-to-end product discovery, strategy, UX research, design, GTM, and operations with limited engineering and design resources, personally building & testing a React onboarding flow and a weighted Haversine matching algorithm while managing a team of four to scale from a dual-market pilot to an international launch.

Senior Marketing Manager • Platform Innovation & Market Expansion • Turo

Jan 2021 - Jan 2023

Led product development and international expansion of host-facing surfaces across research, design, prototyping, coding, and GTM. Delivered strategic market launches in Australia and New York, rebuilt core host onboarding flows, and personally shipped Carculator (host ROI calculator), Business Planner, and Incentive Tracker products. Built a LightGBM vehicle recommendation engine predicting host ROI by make/model/market, resolving data leakage at the aggregation level.

Marketing Manager • Supply Growth & Strategy • Turo

Jul 2019 - Jan 2021

Owned strategy, multi-million dollar acquisition budgets, and execution for rebalancing Turo's host and vehicle supply through the most volatile period in the marketplace's history. Built acquisition systems, measurement and analytics tooling, automation, and logistics infrastructure; launched a nationwide supply delivery network. Led the strategic post-COVID pivot from consumer hosts to professional operators, doubling supply in 12 months and driving Turo's highest-growth year to date.

TANDEMCHAT.AI

SIDE PROJECT

Launched a real-time collaborative AI product for live trip planning, shared thinking and group decisions

Designed and shipped TandemChat, a multi-user AI app where streaming LLM responses are visible to every participant in real time. Solo full-stack build: React, Node, Supabase, Vercel, prompt design and multiplayer streaming.

TRUE NORTH POSTERS

SIDE PROJECT

Launched a personalized travel map art business from consumer insight to profitability in three months

Identified demand for a travel map based personalization product, built a custom DTC website with a dynamic map customization tool and reached profitability in 90 days through rapid iteration and data-driven growth marketing.

EDUCATION

Master's | Global Studies (Focus: International Business, Innovation & Product Design)

UC Berkeley

Researched global cybersecurity and governance gaps in emerging tech, analyzing system vulnerabilities and incentives. Designed and taught curriculum for ~150 students. Applied statistical modeling to infrastructure systems. Built physical and digital products end to end at the Jacobs Innovation Lab. Completed Berkeley's Haas Evening MBA program.

Bachelor's | Political Economy (Focus: Resource Management & Global Systems)

UC Berkeley

Researched Bali's freshwater crisis through fieldwork, multilingual interviews, and quantitative analysis to diagnose system-level failures driven by misaligned incentives. Studied political economy and development. Built CS foundations in algorithms and data structures, and developed product and go-to-market strategy through applied business coursework.
